- ◆ Traffic Control Person
- ◆ Traffic Control Program
- ◆ JHSC Certification Training
- ◆ Workplace Inspection / Accident Investigation
- ◆ Competent Supervisor
- ◆ Lockout / Tagout Energy Hazards
- ◆ Confined Space Attendant, Entry and Rescue

This newest version of Book 7 through the updating process, continues to become more comprehensive and user friendly but that means important changes happened which affects all of your paperwork, including your Traffic Controls Plans and your Health and Safety Program.

References in your Traffic Control Procedures in your H&S program will no longer be accurate if they refer to definitions or specific segments in the OTM Book 7 and or the field edition, these have been added to, reordered and sections renumbered.

The following are key changes to note:

- To make the book more user friendly, a new numbering system was added to the layouts and the book appearance was updated to include colour coding to help navigate the topics.
- Introduction of several new layouts for roundabouts, pedestrian and cycling facilities, and High Occupancy Vehicle lanes.
- Addition of a layout table to help users determine the most appropriate table for use within their traffic management plan.
- Implementation of longer tapers to help traffic more safely maneuver the temporary work zone and improve consistency across Canadian jurisdictions.
- Updated information about the used of AFADs including the distinction of regulatory requirements vs guidelines for use.

To assist our clients, we have printed the OTM Book 7 Field Edition.
