

Merry Christmas and Happy Holidays From NATT Safety Services / Safetyscope

## Court Bulletins Critical Injuries

Review the bulletin below and click on the link to learn more if this hazard could occur in your workplace.

### [Nov 28 Lack of Guarding Critical Injury Saputo Dairy Products Canada Fined \\$79,500](#)

A worker was cleaning and sanitizing the equipment used to process and package various cheese products. The fixed-in-place guards, designed to prevent worker access to in-running nip hazards, were removed from a conveyor to allow the worker access to all parts of the machine for cleaning.

While attempting to clean waste cheese particles that were stuck in the groove of a conveyor drive roller, the worker was critically injured. The conveyor had been running while the worker was cleaning it.

An investigation found that worker would not have been injured had the conveyor been equipped with a guard to protect the worker from accessing the in-running nip hazard.

The employer failed to ensure the measures and procedures prescribed by S 25 of the Reg. 851 for were carried out in the workplace, contrary to S 25(1)(c) of the OHS Act
